Professional Summary

Results-driven Data Analyst & Scientist with 6 months of hands-on experience building predictive models, creating business intelligence dashboards, and driving data-informed decision-making. Expertise in Python, SQL, Power BI, and statistical analysis with proven ability to process 100K+ records and extract actionable insights. Strong foundation in machine learning, ETL pipelines, and data visualization. Demonstrated track record: 82% model accuracy, 40% efficiency improvements, 95% data quality enhancement. Self-motivated, detail-oriented professional skilled in translating complex data into strategic recommendations for stakeholders.

Education

Bachelor of Technology in Information Technology
Madan Mohan Malaviya University of Technology, Gorakhpur

Expected May 2028
CGPA: 9.38/10

Experience

Data Analyst & ML Developer

September 2025 – December 2025

Unified Mentor

Remote

- Processed and analyzed 100K+ records using Python (Pandas, NumPy, Scikit-learn) and SQL, building end-to-end data pipelines for ETL workflows with 95% data quality accuracy
- Developed 5 predictive machine learning models using regression, classification, and feature engineering achieving 82% average accuracy across laptop pricing, e-commerce analytics, and market forecasting
- Created 3 interactive Power BI dashboards reducing manual reporting by 40% and enabling real-time business performance monitoring for stakeholders
- Performed comprehensive exploratory data analysis (EDA) identifying trends including 23% Q4 sales increase, discovering revenue concentration (65%) and key market drivers
- Executed 20+ complex SQL queries including JOINS, aggregations, and subqueries for data extraction and analysis across relational databases
- Applied statistical techniques (hypothesis testing, correlation analysis, regression modeling) and advanced algorithms (sorting, search optimization) improving process efficiency by 40%
- Delivered actionable business recommendations through data storytelling and stakeholder presentations with zero escalations and 100% on-time delivery

Data Analytics Trainee

December 2025 – February 2026

Unlox

Training Program

- Completed intensive training in advanced Python, SQL optimization, machine learning algorithms, statistical modeling, and business intelligence tools

Technical Skills

Programming: Python (Pandas, NumPy, Scikit-learn, Matplotlib, Seaborn), SQL (MySQL, PostgreSQL), R (Basic)

Data Visualization & BI: Power BI (DAX, Power Query, Dashboards), Tableau, Excel (Pivot Tables, VLOOKUP, Advanced Analytics)

Machine Learning & Statistics: Predictive Modeling, Regression Analysis, Classification, Feature Engineering, Hypothesis Testing, EDA, Model Validation

Data Management: Data Cleaning, Preprocessing, ETL Pipelines, Data Quality Assurance, Database Management, Data Warehousing

Data Structures & Algorithms: Arrays, Linked Lists, Trees, Graphs, Sorting/Searching Algorithms, Time Complexity Analysis

Tools & Platforms: Google Colab, Jupyter Notebook, Git/GitHub, Microsoft Office Suite, Linux Command Line

Key Achievements

Machine Learning: Built 5 predictive models (82% average accuracy) solving real-world problems in pricing, sales forecasting, and market analysis

Data Processing: Designed and implemented ETL pipelines processing 100K+ records with 95% data quality using Python and SQL

Business Intelligence: Created 3 interactive dashboards reducing reporting time by 40% and enabling data-driven decision-making

Insights & Analysis: Discovered key trends (23% Q4 spike, 65% revenue concentration) translating into actionable business strategies

Optimization: Improved system efficiency by 40% through algorithm optimization and data structure selection

Core Competencies

Data Analysis | Statistical Modeling | Machine Learning | ETL Pipeline Development | SQL & Database Management | Data Visualization | Dashboard Creation | EDA | Feature Engineering | Time Series Analysis | Predictive Analytics | Problem-Solving | Business Acumen | Data Storytelling | Technical Documentation
