Professional Summary

AI-native builder who lives inside Claude, ChatGPT, and Codex daily to research, build, debug, automate, and ship fast. Hands-on experience using agentic AI tools to build real products – from web applications and data pipelines to automated workflows and analytical dashboards. Strong technical foundation in Python, SQL, and JavaScript with practical experience building and deploying websites independently. Comfortable operating in fast-moving, ambiguous environments with a startup execution mindset – figuring things out using AI tools, iterating quickly, and delivering results without hand-holding.

Education

Bachelor of Technology in Information Technology
Madan Mohan Malaviya University of Technology, Gorakhpur

Expected May 2028
CGPA: 9.38 / 10

Experience

AI-Assisted Data Analyst & Systems Builder

Sep 2025 – Dec 2025

Unified Mentor

Remote

- Used Claude and ChatGPT daily to accelerate code generation, debug data pipelines, interpret complex datasets, and ship analytical deliverables 40% faster than manual workflows
- Built and maintained automated ETL pipelines using Python processing 100K+ records – extracted from multiple sources, transformed with cleaning scripts, loaded into MySQL databases with automated validation
- Wrote 20+ complex SQL queries (JOINS, window functions, subqueries, aggregations) to reconcile and clean operational data across relational databases
- Built 3 interactive dashboards for internal reporting using Power BI – automated data refresh eliminated manual reporting and enabled real-time operational monitoring
- Used AI tools to rapidly build predictive ML models (82% accuracy) for pricing analysis and market forecasting across 5 end-to-end projects
- Independently executed all project phases – from scoping and data collection to model building and stakeholder reporting – demonstrating strong self-directed execution speed

AI Systems Trainee

Dec 2025 – Feb 2026

Unlox

Training Program

- Deepened skills in Python automation, SQL optimization, and AI-assisted workflow building through hands-on enterprise-level projects

Builds & Projects

UniMind – Full-Stack Web Application | *HTML, CSS, JavaScript, AI-assisted development* — Built complete mental wellness web platform for students using AI coding tools for architecture decisions, component building, and debugging; implemented user flows, responsive design, and feature development independently

Goraahi – Travel & Booking Platform | *HTML, CSS, JavaScript, AI-assisted development* — Built full travel booking system with route planning, multi-service integration, and dynamic UI; used AI agents to rapidly iterate features and resolve build issues across the stack

Cafe Website | *Web Design, AI-assisted development* — Independently scoped, designed, and built complete business website for real client including branding, layout system, and content – delivered end-to-end without external dev support

Amazon Sales Analytics System | *Python, MySQL, Power BI, AI tools* — Built automated data pipeline extracting 50K+ records, reconciled operational data via SQL, built dashboard tracking 5 KPIs; used Claude to debug pipeline logic and accelerate SQL query writing

Technical Skills

AI Tools (Daily Use): Claude, Claude Code, ChatGPT, Codex, Cursor, Generative AI Prompting, AI-assisted debugging and code generation

Programming: Python (Pandas, NumPy, Scikit-learn), JavaScript, SQL, HTML, CSS

Web Development: HTML/CSS/JS (proficient), Next.js (learning), Vercel (familiar), Responsive Design

Data & Dashboards: MySQL, PostgreSQL, Power BI, Google Sheets (Advanced), Looker Studio (basic), ETL Pipelines

Automation & Systems: Workflow Automation, Data Pipeline Design, Python Scripting, API Basics

Execution Style: Fast builder, independent executor, AI-native workflow, startup mindset, figures things out
