☎ +91-9696551864 | ✉ anshika1909singh@gmail.com | 🔗 linkedin.com/in/anshika-singh-b3901b348 | 📍 Gorakhpur, India

Professional Summary

Motivated AI/ML enthusiast and Data Science student with hands-on experience designing, developing, and evaluating machine learning models using Python, Scikit-learn, Pandas, and NumPy. Demonstrated ability to work with real-world datasets – cleaning, preprocessing, feature engineering, and building predictive models achieving 82% accuracy. Familiar with deep learning frameworks (TensorFlow, Keras) and passionate about advancing expertise in NLP, computer vision, and recommendation systems. Strong analytical and problem-solving skills with experience collaborating cross-functionally and documenting results clearly. Eager to contribute to Oneture's AI/ML projects in a cloud-first, agile environment.

Education

Bachelor of Technology in Information Technology

Expected May 2028

Madan Mohan Malaviya University of Technology, Gorakhpur

CGPA: 9.38 / 10

- Relevant Coursework: Machine Learning, Data Structures & Algorithms, Statistics & Probability, Database Management Systems, Python Programming, Software Engineering

Experience

AI/ML Data Analyst Intern

Sep 2025 – Dec 2025

Unified Mentor

Remote

- Designed, developed, and tested machine learning models using Python and Scikit-learn – applied regression and classification algorithms achieving 82% average prediction accuracy across 5 real-world datasets
- Cleaned, preprocessed, and engineered features from 100K+ record datasets using Pandas and NumPy – handled missing values, outliers, and data type inconsistencies improving data quality by 95%
- Implemented and evaluated ML algorithms including Linear Regression, Decision Trees, and Random Forest; performed cross-validation, hyperparameter tuning, and model evaluation using precision, recall, and RMSE metrics
- Performed exploratory data analysis (EDA) and statistical analysis to extract meaningful patterns and insights, presenting findings to team through structured reports and visualizations
- Executed 20+ complex SQL queries on MySQL relational databases for data extraction, transformation, and analysis; applied data wrangling techniques to reconcile data across multiple sources
- Collaborated with senior analysts on ongoing projects, documented ML model results, and presented findings clearly to stakeholders with zero escalations and 100% on-time delivery
- Leveraged AI tools (Claude, ChatGPT) to accelerate research on new ML techniques, debug model implementations, and experiment with improved approaches to data preprocessing

Data Science Trainee

Dec 2025 – Feb 2026

Unlora

Training Program

- Advanced training in Python-based ML pipelines, deep learning fundamentals (TensorFlow, Keras), statistical modeling, and SQL optimization for large-scale data processing

ML Projects

Laptop Price Prediction | *Python, Scikit-learn, Pandas, NumPy, Regression* — Preprocessed 1,200+ records with feature engineering across 15+ specifications; implemented regression model achieving 82% accuracy; evaluated using RMSE and R^2 metrics; visualized feature importance and pricing trends

Amazon Sales Forecasting | *Python, MySQL, EDA, Statistical Analysis* — Cleaned and analyzed 50K+ e-commerce records; applied statistical techniques uncovering 23% Q4 revenue spike and 65% revenue concentration in top-10 products; built reporting dashboard for data-driven decisions

Used Bike Price Prediction | *Python, Scikit-learn, Feature Engineering, EDA* — Built regression and classification models on 5,000+ listings with 80% accuracy; applied correlation analysis and feature importance to identify brand and mileage as top pricing drivers (70% variance explained)

Job Market Intelligence | *Python, NLP basics, Data Mining, EDA* — Mined and analyzed 500+ job postings using text analysis and pattern recognition to extract skill demand trends, salary distributions, and market insights – exposure to NLP-based text processing

Technical Skills

Programming: Python (Advanced), SQL, R (basic)

ML Libraries: Scikit-learn, Pandas, NumPy, Matplotlib, Seaborn

Deep Learning Frameworks: TensorFlow (familiar), Keras (familiar), PyTorch (learning)

Machine Learning: Regression, Classification, Clustering, Feature Engineering, Model Evaluation, Cross-Validation, Hyperparameter Tuning, Predictive Modelling

Data Processing: Data Cleaning, Preprocessing, EDA, ETL Pipelines, Statistical Analysis, Data Wrangling

AI/ML Areas: NLP (basics), Computer Vision (exposure), Recommendation Systems (conceptual understanding)

Databases: MySQL, PostgreSQL (SQL); MongoDB, NoSQL (basic understanding)

Cloud Platforms: AWS (familiar with core services: S3, EC2), Google Colab

Tools: Jupyter Notebook, Git, GitHub, Power BI, Excel (Advanced), VS Code

Certifications & Learning

In Progress: Google Data Analytics Professional Certificate (Expected Apr 2026)

Self-Study: Deep learning fundamentals (TensorFlow, Keras), NLP techniques, AWS Cloud foundations

Active Learning: Kaggle ML competitions, hands-on deep learning projects, AI/ML research papers
